Technical Skills

- Website design and development using HTML4/5, CSS3 (& LESS), JQuery/Javascript, PHP5, Apache and MySQL..
- Basic Linux server administration including optimizations (Apache/MySQL), Installing Mods for improving performance.
- Knowledge and experience in using Codeignitor and Joomla frameworks for developing Web Apps.
- I+ year experience in developing/customizing shopping cart softwares such as Virtuemart 1.8/2.0 & GoCart.
- Experience in dealing with SEO and SEM(Google Adwords) campaigns.
- Sound knowledge of OOP concept with 3 Tier Architecture and MVC architecture.
- Designing and Developing Enterprise applications such as Billing Systems, Human Resource, Inventory systems etc.
- Started to work with PhoneGap to develop Android and iOS apps.

Experience

Senior Web Designer and Developer (Nov 2012 – Present)

Gnossem Pte Ltd, Singapore { GNOSSEM.COM }

- 1) Creation of site layout/user interface from the design concepts suggested by the management.
- 2) Developing robust and user friendly web applications as needed.
- 3) Linux server administration and dealing with server migration as and when needed.
- 4) Working on SEO and SEM campaigns.
- 5) Using project management tools such as Zoho to create and maintain timelines for the projects.
- 6) Developing in-house web apps for the company such as Inventory Management systems and Tracking systems.
- 7) Tracking and rectifying all the bugs on the website with precision.
- 8) Working on making the whole site responsive across multiple display devices.
- 9) We use Joomla 1.5 with Virtuemart 1.8 to develop apps for the website. For internal web apps, Codeignitor with bootstraps such as Twitter or Foundation are used.

Freelance Web & Software Developer (Feb 2009 – Oct 2012)

Self Employed.

- 1) Collecting information and analyzing customer requirements.
- 2) Design and Development according to customer request.
- 3) Implementation and further technical support for the clients.
- 4) Creating client centered solutions.
- 5) Working with wide variety of tools to maintain quality in projects delivered.
- 6) Provide a much cheaper capital to invest, at the same time maintain quality.
- 7) Training users with new interface, hence making them well versed with the system before implementation.

Technical Support Analyst (Oct 2010 – Apr 2011)

IBM (Hyderabad, India).

- 1) Resolve problems by balancing the use of troubleshooting tools with analytical application of experience and creativity.
- 2) Validating System & Application Availability.
- 3) Network Administration and troubleshooting devices to resolve issues.
- 4) Use remote troubleshooting tools such as CMC (Citrix Management Console) VNC, IBM Ayudame.
- 5) Learn supported technologies and develop skills required to support the efforts of department.
- 6) Sharing communications and technical documentation with the group.

Web/ IT Projects Completed { as Freelance developer }:

▶ **Quality Marine Engineering PTE LTD (2012) [qme.com.sg]**

Develop a full featured company website including a light weight CMS to update frequent details on the website. As a lead developer and designer, my role was to develop the website from ground up while keeping in mind that minimal resources are utilized.

Technologies used: HTML, CSS, Codeignitor Framework, PHP, MySQL

▶ **Rawgates International Pte Ltd. (2012) [rawgates.com.sg]**

Be the lead design and developer for Rawgates International company website, describing their product range and company portfolio. Project was delivered to customer by end of June 2012.

Technologies used: HTML, CSS

▶ **SG WebGuru Pte. Ltd Singapore (2011 -2012) [lawguru.com.sg]**

Lead Consultant for SG WebGuru Pte. Ltd which owns the portal *lawguru.com.sg*. The job included designing the architecture for the whole website and leading a team of professionals towards completion of the project.

Technologies Used: HTML, CSS, ASP.NET, MS SQL.

▶ **Designer Website: Bloom 7.0 (2009-2010)**

Description: Website was designed as part of a cultural program hosted by Nehru College of Engineering and Research Center, Kerala, India.

Technologies used: HTML, CSS, Javascript.

▶ **Designer Website: MotoExpo (2009-2010)**

Description: Website was designed as part of a Motor show held by Nehru Group of Institutions, Kerala, India.

Technologies Used: HTML, CSS, Javascript.

▶ **Online Order Book (2009)**

Description: This was an online website developed for a Furniture Manufacturing Company. The main aim of the website was to monitor the orders between Front Offices and Manufacturing Industries. It also served as a marketing medium for the company as customers can choose furniture's from the website rather than going directly to the shop, hence avoiding customer's precious time.

Technologies Used: HTML, CSS, ASP.NET, MS SQL.

▶ **Billing & Inventory Management System(2010)**

Description: This was a custom made inventory cum billing system used by Mobile Dealer Shop. This was GUI friendly software which didn't have complexities which were there in conventional billing and inventory systems.

Technologies Used: Visual Basic.NET, MS SQL

Declaration:

I hereby declare that above mentioned information is true and correct to my knowledge.
